

Fleet Services

Driving for work introduces a high level of risk to your organisation. The many and varied risks posed by at-work drivers require a diverse and flexible solution to reduce and manage them.

Cardinus Risk Management has that solution in its wide range of fleet services. Here is an idea of the extent of that range. New fleet products and services are being introduced all the time and our occupational road risk consultants are always keen to hear about your company's needs. If you don't see exactly what you need here, get in touch.

Safe Driving Plus

Safe Driving Plus is our most popular risk assessment/e-learning/in-vehicle training programme and has helped thousands of drivers at hundreds of organisations drive more safely. The risk assessment ensures every driver gets the type of training they need to reduce their levels of risk.

Driver Awareness Training

Often prescribed for higher risk drivers identified by Safe Driving Plus, or bought separately, this in-vehicle course is carried out via our national network of qualified expert trainers. Drivers develop the visual and mental strategies required to improve risk perception and decision-making processes.

Driver Training for Inexperienced Drivers

In-vehicle driver training for employees who have little or no experience of driving on company business. Especially useful for younger drivers.

Speed Awareness Training

Drivers learn to read the road and develop a greater awareness of traffic situations and road conditions. Training covers the dangers of inappropriate speeds and the legal implications for the habitual speeder.

UK Familiarisation Training

Our roads can be a confusing and potentially dangerous experience for overseas employees and visitors. Reduce their risk with a familiarisation course.

Driver Assessor

Part of our 'train the trainer' programme, driver assessor training ensures that there are individuals within your organisation who have a full understanding of the goals of the road risk programme and can mentor drivers who need assistance in reaching acceptable and safe driving standards.

FLEET SERVICES

Driver Safety and Economy Seminar

Enjoyable and educational classroom-based seminar for up to 25 delegates at any location in the UK. It explores attitudes to driving, illustrating the risks that people take on the roads. Drivers learn about the causes of accidents and actions they need to take in order to avoid them. The economy element is designed to allow the seminar to pay for itself many times over.

Winter Driving

Drivers learn how to read changing weather conditions and adapt accordingly.

Driver Licence Checking

We check a driver's licence direct with the DVLA; this should form part of the driver risk assessment.

Grey Fleet Checks

Make sure staff using their own car on company business are fully compliant. Checks for 'business use' insurance cover and valid MoT certificate.

Electronic Driver Permit

Part of the complete end-to-end driver risk management process, an electronic driver permit identifies whether drivers are eligible to drive on company business.

Fleet Risk Management Workshop

Training for employees with responsibility for managing those who drive a company vehicle (directors, senior managers, line managers or supervisors). Can be run for up to 25 delegates at any location in the UK.

Fleet Corporate Audit

Designed to review the effectiveness of your organisation's fleet programme. Cardinus provides a full report with guidance and advice on how to meet current legislation.

Fleetsafe Policy and Driver Handbook

If an organisation provides company vehicles it must produce and distribute a road safety policy statement and staff must be issued with a driver's handbook. Cardinus helps to create both of these documents.

Vehicle Checks and Routine Maintenance

Using a suitable vehicle, your Cardinus trainer will demonstrate daily, weekly and monthly checks that a driver must carry out to ensure their safety and reduce the risk of incident and prosecution.

Mix and Match

Cardinus often adds new fleet services to its range. They can be brought together to form a complete managed service or used individually to address specific requirements. Our driver solutions and services improve many aspects of your fleet risk programme.

You can enjoy:

- reduced insurance premiums and vehicle repair costs;
- fewer incidents and accidents;
- reduced fuel costs;
- better, more aware drivers;
- compliance with legislation and your duty of care obligations.

Cardinus is trusted by many well-known brands in the fleet and driver-training industries, including insurance providers, vehicle leasing companies and breakdown services, to offer white-labelled services on their behalf. They know Cardinus can be relied on to provide premium quality services under their name.

If you would like to know more about what Cardinus can do to reduce your fleet risk, call us on 020 7469 0200, email info@cardinus.com or visit www.cardinus.com.
