

Workwear that works

We rent, launder, maintain and deliver workwear to a wide range of private and public organisations, from fire-fighters and welders to doctors, road-workers and chefs.

To be able to perform tasks in hazardous work environments, you have to be able to rely on the protection levels of your garments for everyday working tasks. Like all protective equipment, protective garments should keep people safe, comfortable and alert.

Optimal protection for all professions

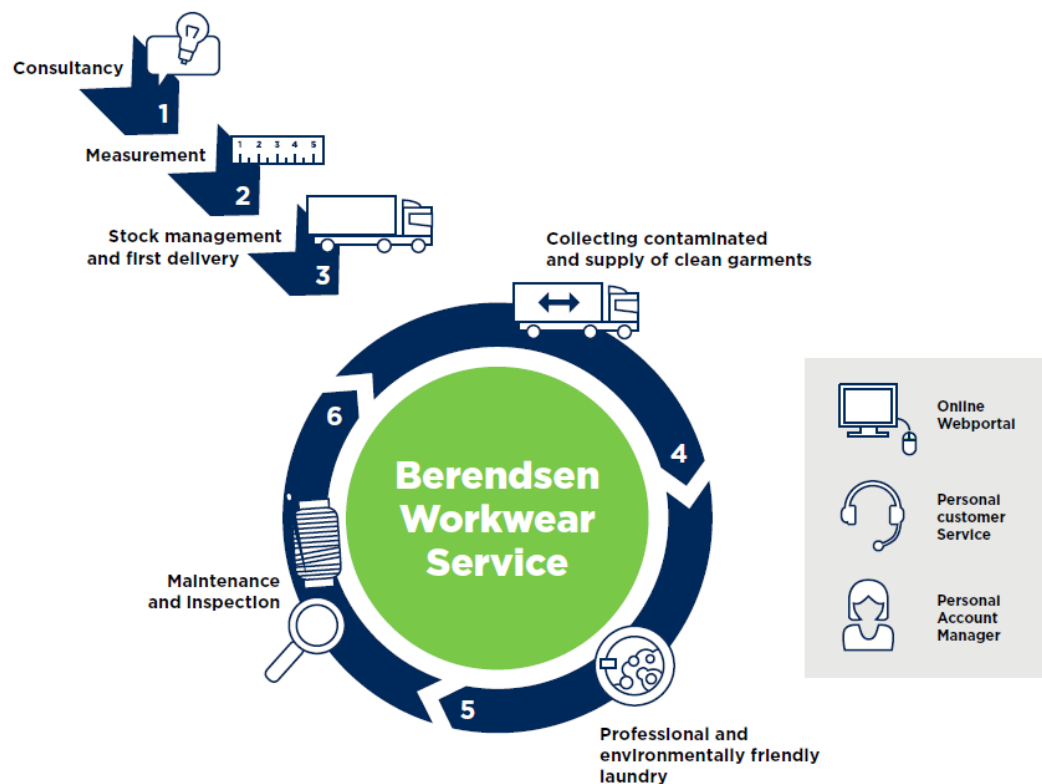

Berendsen workwear meets more than the prevailing standards of visibility, fire resistance, HACCP, chemical resistance and ATEX.

We supply tough, safe, comfortable, hygienic and attractive garments for the Industrial, Protective, Care, Food and Catering segments. Whatever your workwear needs, we can add what's missing to your business.

When you outsource your workwear management to us, there are lots of things you won't have to worry about. We work closely with you to find the right garments and then we take care of everything else, so you free up time, space, personnel and capital to use on your core business

You will benefit from a fully tracked service from collection to delivery with a personal account manager on hand to help.
