# WHAT DOES HACCP MEAN?

HACCP (Hazard Analysis and Critical Control Points) is a standardised management system that describes how to systematically map, assess and control hazards in the production of food with the purpose of ensuring food safety for consumers. These may concern microbiological, chemical, allergenic and physical hazards.

In the EU, it is a requirement that companies that handle foods must apply HACCP, with self-assessment, which must also be based on good hygiene practices (GHP). For workwear, this means no external openings (pockets) are permitted above the waist, that pockets on lower parts must be covered and that fastenings must be metal and securely attached (press studs) etc.

## FRISTADS QUALITY – EVEN AFTER SEVERAL WASHES

As a given Fristads quality statement the industrial workwear range is PRO-labelled. PRO-labelling states that the product is proofed for industrial laundry according to ISO 15797. In addition our garments are also tested in some of Europe's largest laundries in co-operation with our customers.

**PRO**

ISO 15797 is not a standard to which a garment can be certified. It's a specialised test method for industrial laundries where the PROlabelling states the laundry procedure. Look out for the PRO sign next to the article to see if the garment is PRO-labelled. Read more on [www.fristads.com](http://www.fristads.com).

## COMFORTABLE WARM GARMENT AS UNDERWEAR OR LAYER 2

Light and flexible quilted garments with silky surface, which makes them easy to put on and take off. Perfect as warm layer 2 garments for those working, for example, in cold stores. Also comfortable as underwear since the material warms while letting the moisture pass through. The jacket and the waistcoat have an extended back that can be tucked in.

Extended back that can be tucked in. Fastens with velcro strap on the inside of both the jacket and the waistcoat.

900
