ULTRA  
LIGHTWEIGHT

SOFT  
ARMS

BIO-BASED  
MATERIALS

## Designed for ultimate comfort and protection

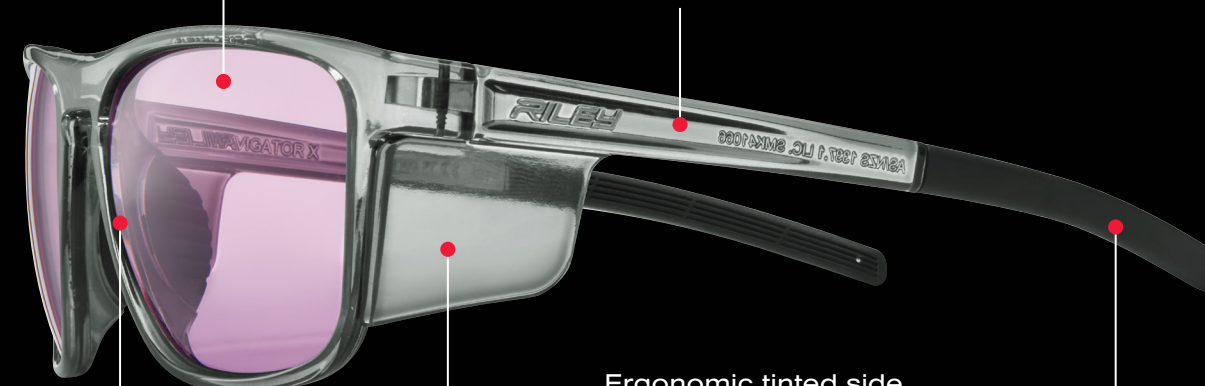

Engineered to the highest safety standards, Navigator X is innovatively designed to offer more comfort for prolonged wear and usage in a wide range of working conditions.

### PREMIUM TECTON 400 TECHNOLOGY

KN UV400, anti-fog, anti-scratch  
and impact resistant

ECO Friendly,  
Bio-based frame  
Reducing CO<sub>2</sub> emissions

Lighter weight  
at just  
28 grams

Ergonomic tinted side  
shield – for full visibility and  
side impact protection

Anti-slip, secure  
nose piece

COMFYTEC

Tapered rubberised  
arms for comfort and  
reduced pressure

Anti-fog to cope with  
**extreme** temperatures

Extremely robust and resilient  
for all working conditions

## Varied lens solutions

### Whatever, whenever

Whatever the environment, we have optical hazards covered with our range of lens options. Available in Clear, Grey, LED, Polarised, Revo Mirror and HD Lenses.

## Ultimate safety standards:

Maximum impact protection for safety eyewear. Complies to the top three major safety eyewear standards globally.

EN166

ANSI Z87.1

AS NZS 1337.1 2010

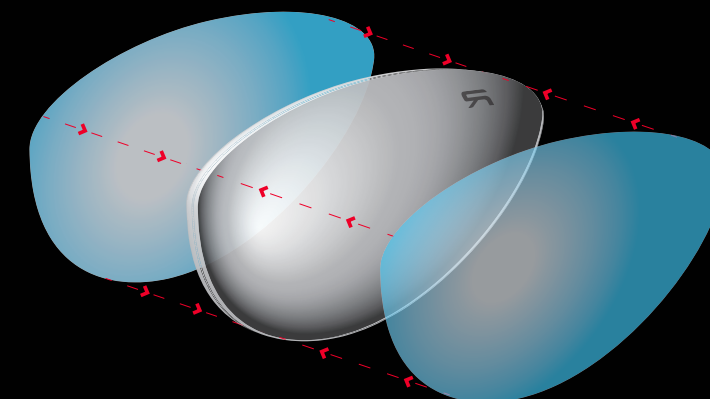

## Lens technology

Within industrial settings and hazardous environments, all parts of a lens can be subject to the harshest of conditions. Riley eyewear uses leading technologies to provide ultimate protection and performance.

### TECTON400™

#### Dual lens coating

Riley TECTON400™ coatings are bonded and cured for the life of the product on BOTH sides of the lenses, giving you excellent resistance to scratching and fogging.

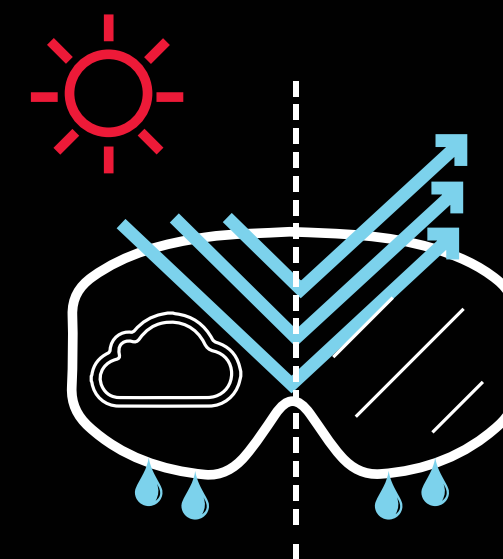

### TECTON400™ – KN UV400 Anti-fog and Anti-scratch protection and moisture repellent

Lenses coated with the TECTON400™ coating offers 100% UVA/ UVB protection, engineered to filter some of the highest energy wavelengths of visible light up to 400nm.

This high-performance premium coating is applied to both sides of the lenses, offering anti-scratch and anti-fog UV400, which is meticulously crafted to withstand temperature extremes without fogging up.

Ideal for those working outdoors, even in extreme conditions, needing vision clarity and wishing to maximise the lifespan of their eyewear.

### PREMIUM TECTON400 TECHNOLOGY

# Innovation in lens tints

The Navigator X is available with a variety of lens tint options to allow safe working in a wide array of applications and working conditions.

**LENS TYPE: Clear**

VLT: 92% Approx | Indoor & Outdoor

Offers true colour recognition, ideal for general-purpose indoor and outdoor work in normal to low light conditions. They provide nearly natural vision while protecting from UV rays.

**LENS TYPE: Grey**

VLT: 14% Approx | Outdoor

Reduces brightness to minimise eye fatigue in moderate to bright environments, ideal for daytime wear and outdoor tasks. Dark-tinted lenses decrease glare without distorting colours.

**LENS TYPE: Polarised**

VLT: 10% Approx | Outdoor

Polarised lenses sharpen vision by filtering out glare from reflective surfaces, making them ideal for outdoor use and activities near water, snow or bright reflective surfaces.

**LENS TYPE: Revo**

VLT: 26% Approx | Outdoor

Revo lenses have a reflective coating on the surface of the lens and similar to polarised lenses, reduce glare of intense sunlight. Available in colourways:

**LENS TYPE: LED**

VLT: 69% Approx | Indoor

Blue-light blocking lenses improve contrast and reduce eye stress. With a soothing light brown tint, reducing LED and fluorescent lighting glare, keeping eyes relaxed and focused.

## Groundbreaking New HD lens

### Upgrade your vision

This first-to-market premium lens option is only available on Navigator X.

High-definition lenses that deliver:

- + Enhanced visibility
- + Crisp clarity
- + Vivid and more vibrant colours

### HD lens

### Naked Eye

**LENS TYPE: HD**

VLT: 34% Approx

Suitable Environment: **Outdoor**

# The Riley CTU

Designed specifically for the Navigator X. With the option to display various lens tints, the range consists of engaging displays to drive sales. Including a built-in mirror for try on.

# The Riley FSU

Ideal in larger spaces, this free-standing display unit allows the showcase of a variety of styles and lens tints. Including a built-in mirror for try on.

# The counter top sample box

Perfect for smaller areas. Allows for display of six frame or lens variations, with easy removal for try on or a closer look.
