

PRODUCT GUIDE ● ● ● ● ●

We believe that getting our products
into your warehouse is the start of
our partnership, not the end.

Chris Wahlers
Managing Director, UK

Kevin Onah
Executive Chairman, UK

Our approach:

I'm often asked how a seventeen-year-old business makes itself recognised in such a competitive market. It's one of my favourite questions and one I always answer in the same way.

"We never lose sight of the fact that our business is all about our customers"

By understanding both our distributors' and our end users' needs, anticipating how they will evolve in the future, and focusing on hand protection solutions for them in the long-term, we can build on the Unigloves brand promise: "Safety through quality".

Of course, appreciating what matters most to an individual end user is just the start. We also invest in understanding the distribution chain. Both the big picture and the fine detail are important – that's why we pride ourselves in having a specialist sales team with experience across the markets we serve. They provide our end users with a unique lens on the glove world and allow us to work with them in visiting customers and undertaking glove audits.

Delivering value to our customer chain demands innovative solutions to keep us ahead of our competition. That means we're tough with ourselves – designing, testing and manufacturing new products and ruthlessly discarding anything that doesn't measure up now or in the future.

Customer focus, specialist teams, innovative solutions – it's a simple story that you'll hear from our colleagues in every part of the Unigloves business. All three are work in progress – constantly developed, tuned and delivered for our customers now and for their future hand protection needs.

Chris Wahlers,
Managing Director, UK

Who we are

Production Line | Seremban / Malaysia

Who we are

UG Healthcare Group

Our parent company, UG Healthcare, has been manufacturing high quality single use gloves since 1988 and is one of the world's leading glove manufacturers, producing up to 100 gloves every second of every day. UG Healthcare is listed on the Singapore Stock Exchange with SGX Symbol 41A.

Our products play a vital role in healthcare and personal protection around the world, so our business is built upon the simple founding principle of Safety through Quality: quality products backed by quality service and support.

Bona fide
manufacturer
with **3** factories
in Malaysia

Annual output of

on **5** continents

UK Business

The UK sales and marketing office supplies Unigloves-manufactured single use gloves to European wholesalers and retailers across multiple sectors, with a focus on the automotive aftermarket, the food industry and the medical market.

Since our entry into the UK market in 2002, we have been dedicated to helping our partners grow sales and margins. Over the last twelve months, we've achieved an average revenue growth rate for our top 10 partners of 35%.

We help you select the best products for you and your market, and we support you with sales, marketing, logistics and technical and regulatory support.

Partnership approach to customer relationships

Ambition, passion and drive run through the business

Single line business entirely focused on gloves

UK's widest stocked range of single use gloves

Experienced team, structured for major account growth

Continuous improvement at the core of our business

Simple, efficient and well-managed supply chain

Cost controls paramount

Our product offering ranges from very low cost, entry level, economy medical gloves, through to market leading premium quality products of exceptional comfort, durability and performance.

What we offer Sales Support

Dedicated Support

Dedicated, experienced sales support and internal buddy, to ensure your account is proactively managed, including joint visits to end users to enhance sales and margin.

Enterprise-Grade IT

Enterprise-grade IT system with customer centric features, to ensure you have accurate and reliable information on your business with us.

24/7 Access

Our full-function online account management platform is available 24/7 so you have always have instant access to your account and order history.

Factory Direct

Commercially competitive and consistent pricing; we pass on the benefits of our efficient supply chain to you.

What we offer
Marketing Support

Supported Brand

Significant recent investment in brand and product collateral; expert help, tools and materials to promote our products and maximise your returns.

Product Samples

Prepacked sample sleeves; we bear the cost of sample requests and product trials so you don't have to.

Experienced Team

Experienced, industry savvy, marketing and design team, dedicated to providing you with professional support for joint online and offline marketing campaigns.

Digital

Digital marketing platform for web and social media marketing to provide greater reach to end users and to provide a steady stream of inbound enquiries.

What we offer
Technical Support

Training

Product training from our experienced technical team, so you can equip your sales team with product knowledge and position them as the product experts.

Reliable Data

Detailed, reliable factory technical data; have confidence that you're selling the product you think you are.

New Product Development

Product development and innovation; differentiate a product often perceived to be a commodity by offering our first-to-market gloves.

Factory Support

Support from the factory team; direct communication with the factory's decision makers.

We tailor our logistics to your requirements, whether it is cartons to multiple locations, pallet quantities to a distribution centre, or containers to a central hub

Century Logistics

Award winning logistics partners with an enviable 'on-time-in-full' track record so you can be confident products will arrive just in time.

Planning

Flexibility and low minimum order quantities, so you can optimise your orders and use your warehouse for higher margin opportunities.

High Stock Holdings

High stock holdings in UK and Malaysia to help mitigate and minimise supply chain risks.

Flexibility

Logistical flexibility: deferred stock; ring-fenced stock and forward orders; bespoke and specific ways to manage stock and consignments to give you competitive advantage.

Strategic Logistics Partner | Century Logistics / Bury St. Edmunds

Distributors

'We believe that getting our products into your warehouse is the start of our partnership, not the end.'

We build our relationship through:

- Our professional, North and South regional sales teams
- Our dedicated, UK based customer service team
- Our technical glove expertise
- Our suite of support materials, e.g. high resolution images and product copy

End Users

Unigloves only sells to Distributors and as the name suggests, end users are the ultimate user of our product range so it's important that we keep channels of communication open to them, so we can:

- gather feedback on our product range
- get insights into how our products are used
- test new product ideas and enhancements
- audit work stations on site to be able to specify the best glove for the job

Medical device regulations

The Medical Devices Directive 93/42/EEC and Medical Devices Regulation (EU) 2017/745 are the principal European legislation governing our range of medical gloves. They are concerned with ensuring that products are safe for patients and users, are manufactured in suitable environments, and that products meet the appropriate product standards.

EN455

Is a series of standards that define gloves that meet the requirements of the Medical Devices Directive 93/42/EEC and are suitable for use in medical procedures.

The regulations and these standards are primarily concerned with protecting the patient.

This standard contains parts 1 - 4 which need to be complied with.

- | | |
|----------------|---|
| EN455-1 | Medical gloves for single use - requirements and testing for freedom from holes |
| EN455-2 | Medical gloves for single use - requirements and testing for physical properties |
| EN455-3 | Medical gloves for single use - requirements and testing for biological evaluation |
| EN455-4 | Medical gloves for single use - requirements and testing for shelf life determination |

Personal Protective Equipment regulations

Personal Protective Equipment (PPE) is designed to protect the user from hazards, the principal European legislation are the PPE Directive 89/686/EEC and the PPE Regulation (EU) 2016/425.

Our gloves certified under these regulations protect the user against common hazards found in industry: micro-organisms and chemical hazards. The main standards for gloves certified as PPE are listed below.

EN420

Defines the general requirements of gloves to comply with the PPE regulations. These regulations and this standard is primarily concerned with protecting the wearer.

EN374

Defines the requirements of gloves to protect against certain chemicals and micro-organisms. The regulations and these standards are primarily concerned with protecting the wearer. This standard contains parts 1 - 5 depending on the glove performance.

The EN (ISO) 374 standards for protective gloves against dangerous chemicals and micro-organisms comprises:

- | | |
|--------------------------|---|
| EN ISO 374-1:2016 | Terminology and performance requirements for chemical risks. |
| EN 374-2:2014 | Determination of resistance to penetration. |
| EN 374-4:2013 | Determination of resistance to degradation by chemicals. |
| EN ISO 374-5:2016 | Terminology and performance requirements for micro-organisms risks. |
| EN 16523-1:2015 | Determination of material resistance to permeation by chemicals.
Permeation by liquid chemical under conditions of continuous contact. |

EN1186

In conjunction with Articles in Contact with Food regulations, defines the requirements of gloves in contact with food.

(N.B. Not all gloves are available in XS or XL)

The Unigloves' Advanced series of gloves is our promise to those who value their hands highly enough to demand the best quality gloves available.

Advanced Processes

Designed to reflect the demands of the most exacting of industry sectors and benefiting from Unigloves' proprietary extended manufacturing process, this range of gloves are significantly easier to don and remove without irritating the skin.

To ensure that we produce gloves that are truly suitable for the demands placed upon them, innovation plays a pivotal role in our design process. As a result, we have developed a comprehensive range of proprietary processes that are incorporated into our Advanced series of gloves. These include Cleanse+ requiring gloves to be washed for up to 3 times longer than regular examination gloves and EasyDon, which ensures that gloves are chlorinated on both the inside and outside areas of the cuff to reduce tackiness and improve donning.

However, there is one aspect that is common to all the Advanced gloves – our attention to detail. This is particularly apparent in our in-house production process which has been perfected over a period of 30 years. In addition to conventional automated manufacturing processes, the Advanced series of gloves are subjected to an enhanced online process and it is this component that is fundamental to creating an exceptionally clean, soft and low-allergy glove.

Advanced Products

From the superior chemical and biohazard resistance of Stronghold and Stronghold+ to the unique low-modulus formulation of Zero, the first glove free from chemical accelerators, zinc and sulphur compounds, the Advanced series of gloves represents the very best in complex design suitable for use in the most demanding of environments.

Kooltouch | GM004*

offline washed · chemical tested · blue · medical grade · medium weight · nitrile · examination gloves

Features:

- Washed offline
- Tested to EN374
- AQL 1.5
- Tested to EN1186
- Nitrile formulation conforms to the hand during use
- Beaded cuff
- Manufactured with textured palms and fingertips
- Medium-weight construction

Benefits:

- Offline washing ensures ease of donning, increased comfort in use and reduced risk of allergic reactions
- Resistant to a range of chemicals
- Meets medical standards for pinholes
- Suitable for contact with all food types
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingertips provide improved grip, particularly when working in wet or oily conditions
- Medium-weight construction provides a balance of strength and sensitivity

Sectors:

- Aerospace
- Chemical manufacture and use
- Dentistry · Dental hygiene
- Electronics · Engineering · Food processing
- Healthcare · Laboratory work
- Manufacturing and assembly
- Pharmaceutical work · Printing

AQL 0.65 · chemical tested · chemotherapy drug tested · purple · medical grade · heavy weight · nitrile examination gloves

Features:

- Tested to EN374
- Tested to ASTM D6978-05
- AQL 0.65
- Tested to EN1186
- Nitrile formulation conforms to the hand during use
- Beaded cuff
- Manufactured with textured palms and fingertips
- Heavy-weight construction

Benefits:

- Resistant to a range of chemicals
- Resistant to a range of cytotoxic drugs when tested to ASTM D6978-05
- Ultra-low hole level; exceeds medical standards for pinholes
- Suitable for contact with all food types
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingertips provide improved grip, particularly when working in wet or oily conditions
- Heavy-weight construction is tough, durable and long lasting

Sectors:

extended cuff · AQL 0.65 · enhanced chemical splash protection · silicone free · purple · medical grade heavy weight · nitrile · unique Unigloves' formulation · single use gloves

Features:

- Free from silicone
- Tested to EN374
- Tested to ASTM D6978-05
- Extended cuff (300mm glove length)
- AQL 0.65
- Tested to EN1186
- Nitrile formulation conforms to the hand during use
- Beaded cuff
- Manufactured with textured palms and fingers
- Heavy-weight construction

Benefits:

- Silicone free formulation means no finger marks on metal and glass surfaces
- Resistant to a range of chemicals
- Resistant to a range of cytotoxic drugs when tested to ASTM D6978-05
- Extended cuff helps prevent liquids getting into the glove when working in wet conditions and provides additional protection from chemical splashes
- Ultra-low hole level; exceeds medical standards for pinholes
- Suitable for contact with all food types
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingers provide improved grip, particularly when working in wet or oily conditions
- Heavy-weight construction is tough, durable and long lasting

Zero | GM005*

zinc, sulphur and accelerator free · low modulus · anti-static · blue · medical grade · medium weight · nitrile examination gloves

Features:

- Free from zinc, sulphur and accelerators
- Tested to EN374
- Low modulus formulation
- Anti-static / EN1149 compliant
- AQL 1.5
- Free from powder
- Free from phthalates
- Tested to EN1186
- Nitrile formulation conforms to the hand during use
- Manufactured with textured fingertips
- Medium-weight construction

Benefits:

- ZAS free formulation reduces risk of Type I and Type IV allergic reactions
- Resistant to a range of chemicals
- Low modulus formulation closely mimics the elasticity and comfort of a latex glove which minimises hand fatigue but retains the other benefits of nitrile
- Anti-static formulation suppresses static charge, preventing sparks
- Meets medical standards for pinholes
- Suitable for those with latex allergies (Type I sensitisation)
- Reduces risks of latex allergies (Type I sensitisation) and minimises particulate contamination
- Suitable for contact with all food types
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Textured fingertips provide improved grip, particularly when working in wet or oily conditions
- Medium-weight construction provides a balance of strength and sensitivity

Unigloves' PRO.TECT heavy-duty gloves; the UK's leading automotive glove range.

DiamondGrip Technology

Inside and outside diamond texture for maximum grip, even when working with oil and grease. All PRO.TECT gloves feature an ergonomic grip and score maximum points for dexterity in international tests.

Chemical Resistant

Ideal for use with brake fluid, thinners, diesel and oil, the PRO.TECT range has been independently tested for chemical permeation by SATRA, experts in PPE certification and testing.

Silicone Free

With an increase in demands for silicone free manufacturing environments, all our nitrile PRO.TECT single use disposable gloves have been developed silicone free, making them ideal for painting or bonding applications, and helping you maintain a silicone free facility.

The PRO.TECT range is also suitable for use in industrial environments including in Manufacturing, Engineering, Construction, Janitorial and Agricultural applications.

PRO.TECT Black HD | GA006*

enhanced chemical splash protection · silicone free · black · heavy duty · unique Unigloves' formulation single use gloves

Features:

- Free from silicone
- Tested to EN374
- AQL 1.5
- Ambidextrous
- Nitrile formulation conforms to the hand during use
- Beaded cuff
- Manufactured with textured palms and fingers
- Ultra-heavyweight construction

Benefits:

- Silicone free formulation means no finger marks on metal and glass surfaces
- Resistant to a range of chemicals
- Meets medical standards for pinholes
- Ambidextrous fit means you don't have to split a pair to replace a damaged glove
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingers provides improved grip, particularly when working in wet or oily conditions
- Ultra-heavyweight construction is very tough, durable and long lasting

Sectors:

- Automotive · Automotive maintenance and repair
- Chemical manufacture and use · Construction
- Electronics · Engineering · Floristry and gardening
- General assembly · Glass · Inspection · Laboratory work
- Light duty maintenance · Maintenance · Manufacturing and assembly
- Painting and decorating
- Repair · Utility

* The last digit of the order code is dependent on the glove size, e.g 1 = X/Small, 5= X/Large.
(N.B. Not all gloves are available in XS or XL)

Gloves don't have to be blue or white. With a selection of fifteen colours, Unigloves' Pearl is a selection of coloured nitrile gloves so you can colour-code in any environment.

Colour-coding to reduce the risk of cross contamination

Pearl has been designed with functionality in mind, by offering a series of colours which are suitable for colour-coding in the work environment to help avoid cross-contamination.

Textured finish for superior grip

The Pearl range are premium quality, chemically tested, medical grade, powder-free nitrile gloves that offer enhanced barrier protection with a beaded cuff and textured finish for superior grip. A grip that works for glove users improves their performance and increases workforce motivation in terms of correct glove usage, improving their safety and your compliance.

An ideal choice for the Food Industry

All fifteen Pearl nitrile gloves are suitable for use with all food types, including fatty foods, and therefore make the ideal choice for use in the food industry where the use of colour coding is proven to combat the risks associated with cross contamination.

Pearl | GP0***

15 colours · medical grade · medium weight · nitrile · examination gloves

Features:

- Tested to EN374
- Available in fifteen colours
- AQL 1.5
- Free from powder

Our Select Black gloves are a range of black, single use gloves, designed and engineered by Unigloves and supplied to tattoo artists around the world.

Inspired by the creativity, skill and diversity of tattoo artists; we have been perfecting our Select Black gloves for over 25 years, so they maximise barrier protection, comfort, grip and dexterity leaving time for the artist to focus on creating beautiful tattoos.

Better for your skin

Select Black gloves are manufactured using our unique Advanced production method, a proprietary process that make our gloves softer, easier to don, and more comfortable in use than standard gloves, while significantly reducing risks of allergies.

Wrist and forearm protection

Select Black are available in natural latex and synthetic nitrile latex, standard length and extended cuff for wrist and forearm protection.

Select Black Latex | GT002*

offline washed · black · chemical tested · medical grade · medium weight · latex examination gloves

Features:

- Tested to EN374
- AQL 1.5
- Matt-black finish
- Free from powder
- Ambidextrous
- Beaded cuff
- Manufactured with textured palms and fingertips
- Medium-weight construction

Benefits:

- Resistant to a range of chemicals
- Meets medical standards for pinholes
- Matt black finish masks blood and ink, and reduces hand and eye strain when working on complex designs
- Reduces risks of latex allergies (Type I sensitisation) and minimises particulate contamination
- Ambidextrous fit means you don't have to split a pair to replace a damaged glove
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingertips provide improved grip, particularly when working in wet or oily conditions
- Medium-weight construction provides a balance of strength and sensitivity

Sectors:

- Hair and beauty
- Piercing
- Tattoo

* The last digit of the order code is dependent on the glove size, e.g 1 = X/Small, 5= X/Large.
(N.B. Not all gloves are available in XS or XL)

Our Unicare single use glove range has been developed especially to provide exceptional levels of comfort and come in nitrile, vinyl, vinyl/nitrile blend, latex and polythene. Our Unicare gloves are medical grade, and particularly suited to use in medical applications, dental and veterinary care.

A glove to suit every need

Latex gloves provide an excellent protective barrier due to their durability and integrity while remaining comfortable to wear and easy to put on. Our Unicare range includes powder free and powdered latex, all praised for their strength, soft comfort, and consistent grip.

Nitrile gloves are a great alternative for those that may be prone to skin irritation and allergic reactions. Nitrile gloves offer the same strong durability and superior level of protection as traditional latex gloves with increased tactile sensitivity, tear resistance, and a more comfortable fit. Our Unicare nitrile gloves are available in packs of 100 or 200 gloves.

Our Unicare vinyl gloves are made with an unique low-friction inner polymer coating for smooth donning and are tapered at the wrist to better fit your hand. Unicare vinyl gloves feature beaded cuffs for extra strength and tear resistance.

Unicare Nitrile | GS003*, GS004* & GV001*

blue · medical grade · light weight · nitrile · examination gloves

Features:

- Tested to EN374
- AQL 1.5
- Free from powder
- Free from phthalates
- Tested to EN1186
- Nitrile formulation conforms to the hand during use
- Beaded cuff
- Manufactured with textured palms and fingertips
- Lightweight construction

Benefits:

- Resistant to a range of chemicals
- Meets medical standards for pinholes
- Reduces risks of latex allergies (Type I sensitisation) and minimises particulate contamination
- Suitable for contact with food
- Suitable for contact with all food types
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingertips provide improved grip, particularly when working in wet or oily conditions
- Lightweight construction provides good tactile sensitivity with reduced cost

Sectors:

- Care home work · Cleaning and janitorial · Dentistry · Dental hygiene
- Emergency services · Food processing · General assembly · Healthcare
- Hospital and clinical duties · Laboratory work · Janitorial

- Available in clear and blue

Benefits:

- Polythene gloves are a cost-effective alternative to vinyl gloves, while protecting against cross contamination, dirt and potential irritants in low-risk situations
- Manufactured and tested in accordance to EN1186 food safe standards
- Ideal for short-term, low-risk tasks such as food handling
- Unigloves takes additional steps in the manufacture of its gloves to ensure the highest standards of protection are achieved

Sectors:

- Food preparation
- Food handling

Europe's first nitrile examination glove with antimicrobial protection
Exclusively from Unigloves

Designed to mitigate risks of cross-contamination

Incorporating silver ion technology from BioCote®

Unigloves' Fortified gloves contain BioCote® with proven antimicrobial protection.

BioCote® is silver ion technology. It has been used in the manufacture of Unigloves' Fortified gloves to provide antimicrobial properties. Ionic silver particles are impregnated throughout the rubber nitrile during glove production.

Why Silver?

Silver has been used for centuries for its abilities to aid preservation, for example, the ancient Greeks used silver vessels to keep their water fresh. Silver is an ideal antimicrobial agent due to its effectiveness against a range of microorganisms.

How does Silver work in gloves?

Silver ions are present at the surface of the glove and are available to act against contaminating microbes. The silver ions bind with and irreparably damage their cells; disrupt normal functions essential to survival; stopping them from reproducing and rendering them harmless.

Destroys 99.9% of bacteria

Scientifically proven results have shown that BioCote® treated materials destroy 99.9% of bacteria they come into contact with.

Fortified nitrile gloves are:

Effective

Fortified gloves are protected from colonisation by microbes, enhance hygiene and are a more hygienic alternative to standard nitrile examination gloves.

Long-lasting

Fortified gloves maintain their antimicrobial performance for the lifetime of the glove.

Proven

Fortified gloves have been shown to be effective against all types of bacteria. BioCote® silver ion technology has been proven to materially reduce microbes by up to 99.5%.

Accredited

BioCote® silver antimicrobial technology is considered food-safe and a suitable addition to food contact articles.

Fortified Blue Nitrile | GF001*

antimicrobial · blue · medical grade · medium weight · nitrile · examination gloves

Features:

- Tested to EN374
- Infused with BioCote® silver ion antimicrobial technology
- AQL 1.5
- Free from phthalates
- Tested to EN1186
- Ambidextrous
- Manufactured with textured palms and fingertips
- Medium-weight construction

Benefits:

- Resistant to a range of chemicals
- BioCote® antimicrobial technology reduces risks of cross-contamination and is proven effective against all types of bacteria
- Meets medical standards for pinholes
- Suitable for contact with food
- Suitable for contact with all food types
- Ambidextrous fit means you don't have to split a pair to replace a damaged glove
- Textured palms and fingertips provide improved grip, particularly when working in wet or oily conditions
- Medium-weight construction provides a balance of strength and sensitivity

Sectors:

- Care home work · Cleaning and janitorial · Dentistry
- Dental hygiene · Emergency services · Food processing
- Hair and beauty · Healthcare · Hospital and clinical duties
- Janitorial · Laboratory work · Local Authority work
- Pharmaceutical work · Piercing · Tattoo

Universal Holder Dracula | DH0001

wall mounted holder for glove, face mask and tissue boxes with “teeth” which automatically adjust to hold any size of box firmly in place

Conveniently keeps boxes of disposable gloves, face masks, tissues or wipes within reach when mounted near work area. Perfect for doctor's offices, laboratories, industrial facilities or wherever efficiency counts. The spring-loaded clamp is adjustable to fit many box sizes.

Features:

- Easy to mount with two adhesive strips on the back, as well as two screw holes for stronger installation
- Internal adjustable size range: 102 mm - 138 mm
- Spring loaded mechanism holds box firmly in position
- “Teeth” to hold the box firmly in place
- Suited for Unigloves glove and face mask boxes
- Holds boxes up to 0.9 kg
- Allows one-hand operation
- Suitable for use in hygienically sensitive areas such as hospitals, GP surgeries, food factories and care homes

Installation:

Universal holder comes ready to install with 2 adhesive strips on the back, for mounting on smooth non-porous surfaces. Two screw holes have been provided, if stronger installation is required.

To insert box, push top of holder upwards with box as shown. The “teeth” will clamp down on box and hold it securely in place.

Sectors:

The holder can be used in a wide range of workplaces and industries, including healthcare, industrial plants, janitorial and local authorities.

Packaging:

50 pieces per box

(N.B. Not all gloves are available in XS or XL)

Rough or damaged skin can be painful, particularly when you rely on your hands for your job. Coated with a micro layer of natural moisturisers and vitamins, Vitality gloves revitalise your skin while you work.

For those at high risk of dermatitis due to repeated wearing of gloves, and in particular for those regularly required to wash their hands, Vitality gloves can make each day more comfortable, allowing you to focus on the tasks at hand.

Better for your skin

The proprietary moisturising coating on our Vitality gloves traps skin moisture during use and reduces visible dryness. Vitality gloves have been independently proven to be better for your hands than standard, non-coated examination gloves.

No detail is too small

These are no ordinary gloves:

Washed inside and out during production for up to 10 times longer than standard gloves, Vitality gloves are cleaner, softer, and more comfortable.

Manufactured with specially treated cuffs, Vitality gloves won't catch on your skin when you put them on or take them off.

Treated using the same proprietary processes as the gloves in our Advanced range, Vitality gloves minimise the risks of Type I, Type IV, and irritant allergies.

Individually inspected so only our best gloves make it to the final box, and fully textured across the glove, not just the fingertips, for better grip.

Vitality Nitrile | GD003*

moisturising · offline washed · white · medical grade · medium weight · nitrile · examination gloves

Features:

- Washed offline
- Microfilm inner coating contains a combination of natural moisturisers
- Tested to EN374
- AQL 1.5
- Free from powder
- Tested to EN1186
- Nitrile formulation conforms to the hand during use
- Beaded cuff
- Manufactured with textured palms and fingertips

Benefits:

- Offline washing ensures ease of donning, increased comfort in use and reduced risk of allergic reactions
- Microfilm inner coating helps protect and nourish skin, and aids donning
- Resistant to a range of chemicals
- Meets medical standards for pinholes
- Reduces risks of latex allergies (Type I sensitisation) and minimises particulate contamination
- Suitable for contact with all food types
- Nitrile formulation conforms to the hand during use for a more comfortable fit
- Beaded cuff provides extra strength during donning and helps prevent liquid roll back
- Textured palms and fingertips provide improved grip, particularly when working in wet or oily conditions

GLOVE SIZING GUIDE

Wearing the right size glove is important.

Tight gloves can restrict dexterity, cause discomfort and hand fatigue. Loose gloves that don't have the requisite stretchiness represent a safety hazard to users and also can result in unnecessary fatigue.

Please note that this guide should be printed on A4 at actual size, as using enlarge or fit to page settings will change the size of the guide. Use the printed ruler to check it has been printed the correct size.

To determine your glove size, place your left hand over the image above, with your thumb to the right and fingers closed. Measure your hand across the widest point as depicted.

We recommend that you try gloves prior to use to ensure the best fit.
